

CRITERIA FOR PRIOR AUTHORIZATION

Antipsychotic Medications – Safe Use for All Ages

PROVIDER GROUP Pharmacy

MANUAL GUIDELINES The following drugs (all strengths and dose forms) will require prior authorization as outlined in the criteria below:

Aripiprazole (Abilify®, Abilify Discmelt®, Abilify Maintenna®, Aristada®)	Olanzapine pamoate (Zyprexa Relprevv®)
Asenapine (Saphris®)	Olanzapine/Fluoxetine (Symbyax®)
Brexiprazole (Rexulti®)	Paliperidone (Invega®)
Cariprazine (Vraylar®)	Paliperidone palmitate (Invega Sustenna®, Invega Trinza®)
Chlorpromazine	Perphenazine
Clozapine (Clozaril®, Fazaclo®, Versacloz®)	Pimozide (Orap®)
Fluphenazine	Quetiapine (Seroquel®, Seroquel XR®)
Haloperidol (Haldol®, Haldol® Deconate)	Risperidone (Risperdal®, Risperdal Consta®, Risperdal M-Tab®)
Iloperidone (Fanapt®)	Thioridazine
Loxapine (Adasuve®, Loxitane®)	Thiothixene
Lurasidone (Latuda®)	Trifluoperazine
Olanzapine (Zyprexa®, Zyprexa Zydis®)	Ziprasidone (Geodon®)

CRITERIA FOR PRIOR AUTHORIZATION FOR ANTIPSYCHOTICS:

- PROVIDER TYPE/DIAGNOSIS:
 - For children < 6 years of age:
 - Must be prescribed only by (ages < 4 years) or in consultation/collaboration with (ages 4 – < 6 years) a psychiatrist, neurologist, or developmental/behavioral pediatrician.
 - Child must have a diagnosis of mood disorder, psychotic disorder, Tic disorder (i.e. Tourette's disorder), Autism Spectrum Disorder, PTSD with associated severe agitation.
 - For children and adolescents ages 6 to < 18:
 - Child must have a diagnosis of mood disorder, psychotic disorder, Tic disorder (i.e. Tourette's disorder), Autism Spectrum Disorder, PTSD with associated severe agitation.
 - For patients ≥ 65 years of age (long-term care, non-dual eligibility group) (must meet one of the following):
 - Diagnosis of schizophrenia, schizoaffective, delusional disorder, unspecified psychotic disorders, Huntington's disease (G10), Tourette's syndrome (F95.2), bipolar disorder, adjunctive treatment of major depressive disorder or irritability associated with autistic disorder.
 - Dementia/major neurocognitive disorder for the treatment of agitation or psychosis when symptoms are severe or dangerous to self or others.
- MULTIPLE CONCURRENT USE:
 - For patients receiving multiple antipsychotics concurrently, prior authorization will be required for:
 - Patients < 18 years of age, when two or more antipsychotics used concurrently for greater than 90 days (includes oral and long-acting injectables)
 - Must be prescribed by or in consultation/collaboration with a psychiatrist, neurologist, developmental/behavioral pediatrician
 - Patients ages ≥ 18 years of age, when three or more antipsychotics used concurrently for greater than 60 days (includes oral and long-acting injectables)
 - Must be prescribed by or in consultation/collaboration with a psychiatrist
 - Patients ages ≥ 18 years of age, when two or more concurrent long-acting injectable antipsychotics for greater than 60 days
 - Prior authorization will require a written peer-to-peer consult with health plan psychiatrist, medical director, or pharmacy director for approval, followed by a verbal peer-to-peer, if unable to approve written request.

APPROVED PA Criteria

- DOSING LIMITS:
 - The antipsychotic dose must not exceed the dosing limit listed in Table 1. If the dosing limit is exceeded, prior authorization will be required.
 - Prior authorization will require a written peer-to-peer consult with health plan psychiatrist, medical director, or pharmacy director for approval, followed by a verbal peer-to-peer, if unable to approve written request.
 - Drugs listed in Table 1 as not approved for the specified age range will require an appeal.

LENGTH OF APPROVAL: 12 months

*A one-time 30 day override for this criteria requirement will be available to dispensing pharmacies through the Point-of-Sale PBM adjudication system.

RENEWAL CRITERIA:

- Attestation of attempted gathering of fasting plasma glucose, lipid screening, weight, height, and Abnormal Involuntary Movement Scale (AIMS) within the previous 12 months.
- Patient is stable and has been seen in the past year.

Note – General prescribing recommendations:

- Prescriber should attempt to gather fasting plasma glucose, lipid screening, weight, height and Abnormal Involuntary Movement Scale (AIMS) evaluation within the previous 12 months.
- Documentation of developmentally-appropriate, comprehensive psychiatric assessment should be completed by the prescriber and documented in the child's medical record.
- Patient assessment should include DSM-5 or most updated edition of DSM diagnosis, screening for parental psychopathology, evaluation of family functioning and gathering collateral information from community resources (e.g.. School).
- Non-psychopharmacological interventions (i.e. training parents or caregivers in evidence-based behavior management) should be initiated before (and maintained, if indicated, during) psychopharmacological treatment is initiated.
